

JAVA DAILY PRACTICE QUESTIONS (BEGINNER)

DAY 1 – BASICS

1. Write a Java program to print "Hello World".
2. Write a program to print numbers from 1 to 10.
3. Write a program to take two numbers as input and print their sum.
4. Write a program to check whether a number is even or odd.
5. Write a program to find the largest of three numbers.

DAY 2 – LOOPS

1. Write a program to print first N natural numbers.
2. Write a program to print multiplication table of a number.
3. Write a program to calculate factorial of a number.
4. Write a program to reverse a number.
5. Write a program to count digits in a number.

DAY 3 – PATTERNS

1. Print a right-angle star pattern.
2. Print an inverted star pattern.
3. Print a number pattern (1, 12, 123).
4. Print a square star pattern.
5. Print a pyramid star pattern.

DAY 4 – ARRAYS

1. Write a program to declare and print an array.
2. Write a program to find sum of array elements.
3. Write a program to find the largest element in an array.
4. Write a program to reverse an array.
5. Write a program to count even and odd numbers in an array.

DAY 5 – STRINGS

1. Write a program to find length of a string.
2. Write a program to reverse a string.
3. Write a program to check if a string is palindrome.
4. Write a program to count vowels in a string.
5. Write a program to compare two strings.

DAY 6 – METHODS & OOPS

1. Write a method to add two numbers.
2. Create a class and object in Java.
3. Demonstrate encapsulation with getters and setters.
4. Demonstrate inheritance using two classes.
5. Demonstrate method overloading.

DAY 7 – COLLECTIONS & EXCEPTION

1. Write a program to store elements in ArrayList.
2. Write a program to remove duplicate elements using Set.
3. Write a program to store key-value pairs using HashMap.
4. Write a program to handle division by zero using try-catch.
5. Write a program to create and throw a custom exception.
